

Jecho Laboratories Job Opportunity (please submit resume to hr@jecholabs.com)

TITLE: Analytical Development/Quality Control Associate

LOCATION: Frederick, MD

REQ#: 19-007

Overview: Jecho Laboratories, Inc. (Jecho) is a biopharmaceutical company developing innovative therapeutic biologics, including therapeutic monoclonal antibodies, cytokines, immunotoxins, and vaccines to address a broad range of diseases as well as treatment of cancer and infectious disease. The company headquarter is located in Frederick Maryland, USA.

We are seeking a highly energetic and capable individual to join our Analytical Assay Development and Quality Control group. Qualified individual will design, develop and qualify analytical methods for drug products, and perform the tests. The candidate will receive general instructions and assignments from supervisor, and accomplish the tasks with minimal supervision. The candidate is expected to be self-motivated, well-organized and highly-productive. Our company thrives as one cohesive team where individual must be willing to take responsibilities outside his/her core competencies and learn new skills. This presents a tremendous opportunity for expanding individual's knowledge and career advancement.

Essential Job Functions:

- Develop analytical assays, ie HPLC- and UPLC-based chromatography assays, ELISA, SDS-PAGE, immunoblotting etc.
- Perform HPLC-, UPLC-, ELISA-based assays on in-processes and final bulk materials to optimize up/down stream processes.
- Perform release tests and stability tests, ie, SEC-HPLC, RP-HPLC, IEX-HPLC, Electrophoresis, ELISA, HCP, HCD and bioactivity assays on final drug products.
- Participate technology transfer.
- Participate GMP assay qualification and testing,
- Assist in the writing, reviewing, and editing of standard operating procedures.
- Generate and maintain experimental data in a highly organized manner. Provide reports for assessment by supervisor.

Minimum Requirements:

- Bachelor or master's in chemistry or biological science with 1-3 year's experience in developing pharmaceuticals and biologics.
- A solid understanding of the analytical technologies for characterization of recombinant biological products, such as HPLC, ELISA etc.
- Experience with Mass Spectrometry is a plus.
- Fast learning to operate analytical instrument and data acquisition software.
- Proven record of a good grasp of analytical instrument and trouble shooting.
- Demonstrated ability to carry out tasks independently, ie lay out the experiments thoroughly, execute the plans accordingly, analyze the data critically, and summarize the results comprehensively.
- Willingness to take on new responsibilities.
- Ability to communicate and work effectively with cross-functional team.

Compensation:

- Jecho offers a competitive salary (commensurate with experience) and excellent benefits package, including health insurance, dental/vision insurance, short-term and long-term disability insurance, and 401(k) retirement plan.
- Jecho is an equal opportunity employer.
