

Jecho Laboratories Job Opportunity (please submit resume to hr@jecholabs.com)

TITLE: Analytical Development Scientist/Associate Scientist

LOCATION: Frederick, MD

REQ#: 19-006

Overview: Jecho Laboratories, Inc. (Jecho) is a biopharmaceutical company developing innovative therapeutic biologics, including therapeutic monoclonal antibodies, cytokines, immunotoxins, and vaccines to address a broad range of diseases as well as treatment of cancer and infectious disease. The company headquarter is located in Frederick Maryland, USA.

We are seeking a highly energetic and capable individual to join our Analytical Assay Development and Quality Control group. Qualified individual will design, develop and qualify analytical methods for drug products, and perform the tests. The candidate will receive general instructions and assignments from supervisor, and accomplish the tasks independently. The candidate is expected to be self-motivated, well organized and highly productive. Our company thrives as one cohesive team where individual must be willing to take responsibilities outside his/her core competencies and learn new skills. This presents a tremendous opportunity for expanding individual's knowledge and career advancement.

Essential Job Functions:

- Lead analytical method development, especially bioactivity assays and potency assays. Responsibilities includes establishing new cell lines, developing new analytical methods, qualifying analytical methods, and performing in-process sample tests, release tests, and stability tests.
- Familiar with the operation of the following instrument, such as ELISA plate reader, washer, Cell imager, Octet, flow cytometer, HPLC, and others.
- Design and execute experiments independently. Generate and maintain critical data in a highly organized manner. Analyze data and interpret results with sound rationales.
- Write Standard Operation Protocols, assay development reports, assay qualification reports, and other required documents.
- Collaborate and support other departments to delineate the MOA of Jecho drug products, to develop robust and highly efficient up-stream and down-stream processes.
- Participate in technology transfer and generate technical reports.

Minimum Requirements:

- Ph.D. in biological science or related areas, with >2 years' experience in assay development, or MS in biological science or related areas, with >5 years' experience in assay development.
- The candidate is expected to be self-motivated, well organized, and multi-tasking. The team-orient personality is a must.
- Broad and solid knowledge in cell biology, biochemistry and biophysics is essential. Knowledge on immunology or oncology is a plus.
- Expert of state-of-the-art analytical technologies, ie ELISA, cell culture, potency assays, residual assays etc.
- Strong hands-on experience on analytical assay development, and biologic drug product analysis. A demonstrated record of analytical assay development and troubleshooting is essential.
- Strong technical writing, good documentation and record keeping, and excellent communication are essential.
- Previous experience in GMP/GLP work environment is a plus. Previous experience on biologics licensure application is a plus.
- Qualified candidate is expected to be savvy on computer software including Excel, Word and PowerPoint.

Compensation:

- Jecho offers a competitive salary (commensurate with experience) and excellent benefits package, including health insurance, dental/vision insurance, short-term and long-term disability insurance, and 401(k) retirement plan.
- Jecho is an equal opportunity employer.
